

Student Management System in C

- A mini project using C language

Introduction

- This project manages student records using C programming.

Features

- Add student
- Display students
- Search student
- Delete student

Structure of Program

- `#include<stdio.h>`
- `int main(){`
- `// logic here`
- `}`

Functions Used

- `addStudent()`
- `displayStudent()`
- `searchStudent()`
- `deleteStudent()`

Advantages

- Easy to use
- Fast execution
- Simple logic

Applications

- School management
- College records

Conclusion

- C helps in building real-time applications easily
